WELLHEAD PROTECTION PLAN

CITY OF DICKSON WATER & SEWER DEPARTMENT DICKSON, DICKSON COUNTY, TENNESSEE

THE CITY OF DICKSON WATER & WASTEWATER DEPARTMENT HAS DEVELOPED THE FOLLOWING WRITTEN POLICY IN PROTECTING ITS WELLHEAD PROTECTION AREAS:

- 1) THE DICKSON WATER DEPARTMENT WILL NOT STORE CHEMICALS OTHER THAN THOSE USED FOR DRINKING WATER TREATMENT WITHIN THE WELLHOUSE OR ADJACENT TO THE WELL.
- 2) THE DICKSON WATER DEPARTMENT WILL NOT ALLOW CHEMICALS TO BE APPLIED ADJACENT TO THE WELL (MINIMUM OF 100 FEET). A SIGN WILL BE POSTED AT EACH WELL WHICH READS "WELLHEAD PROTECTION AREA - NO CHEMICALS TO BE APPLIED TO THE LAND WITHIN 50 FEET OF THE WELLS".
- 3) THE DICKSON WATER DEPARTMENT HAS IDENTIFIED THE WELLHEAD PROTECTION AREAS TO THE COUNTY PLANNING COMMISSION AND COUNTY GOVERNMENT AND ASKED TO BE ALLOWED TO REVIEW AND COMMENT ON ACTIONS THAT FALL WITHIN THE WELLHEAD PROTECTION AREAS.
- 4) THE DICKSON WATER DEPARTMENT WILL ACTIVELY OBSERVE THE ACTIVITIES WITHIN THE DESIGNATED WELLHEAD PROTECTION AREAS AND REPORT PERTINENT INFORMATION TO THE DIVISION OF WATER SUPPLY. THE DICKSON WATER DEPARTMENT WILL UPDATE THE POTENTIAL CONTAMINANT SOURCE INVENTORY WHEN SIGNIFICANT CHANGES OCCUR WITHIN THE WELLHEAD PROTECTION AREAS. THE DICKSON WATER DEPARTMENT WILL UPDATE THE WELLHEAD PROTECTION PLAN EVERY THREE YEARS BY REVIEWING THE WELLHEAD PROTECTION AREAS AT LEAST ANNUALLY FOR ANY NEW POTENTIAL CONTAMINANT SOURCES.
- 5) THE DICKSON WATER DEPARTMENT WILL INSERT IN THE LOCAL DICKSON HERALD NEWSPAPER THE REQUIRED INFORMATION ABOUT WELLHEAD PROTECTION UPON APPROVAL OF THE WELLHEAD PROTECTION PLAN AND WILL CONTINUE TO DO SO AT 6 MONTH INTERVALS.
- 6) CONTINGENCY PLANNING - IN THE CASE OF AN EMERGENCY SPILL WHICH COULD IMPACT THE WATER SOURCE WITHIN THE WELLHEAD PROTECTION AREA, THE DICKSON WATER DEPARTMENT WILL CONTACT:

TENNESSEE EMERGENCY MANAGEMENT AGENCY
AT 1-800-262-3300
WITHIN 24 HOURS

DICKSON COUNTY SHERIFF'S OFFICE
AT 446-8041
WITHIN 24 HOURS

TENNESSEE DIVISION OF WATER SUPPLY
AT (615) 532-0191
WITHIN 72 HOURS

CONTINGENCY PLAN

TO FULFILL THE CONTINGENCY PLANNING PORTION OF THE WELLHEAD PROTECTION REGULATIONS, THE DICKSON WATER DEPARTMENT HAS PROVIDED INFORMATION ON THE FOLLOWING:

- A. A LISTING OF ALL SOURCES OF DRINKING WATER CURRENTLY AVAILABLE TO THE PUBLIC WATER SUPPLY;
 - 1) PINEY RIVER INTAKE 2MGD
 - 2) CITY LAKE 80MG TOTAL STORAGE - WITHDRAWL 1MGD
 - 3) WELL DK-21 300GPM
 - 4) TURNBULL UTILITY DISTRICT- .250MGD
- B. AN ESTIMATE OF THE QUANTITY OF WATER CURRENTLY AVAILABLE FROM CURRENTLY CONNECTED SOURCES;
SEE LIST ABOVE
- C. IDENTIFICATION OF ADDITIONAL WATER SUPPLIES THAT WILL MEET FUTURE NEEDS;
NOT YET IDENTIFIED
- D. IDENTIFICATION OF ANY ACTIONS THAT HAVE BEEN TAKEN BY LOCAL GOVERNMENTS TO PROTECT DESIGNATED FUTURE WATER SUPPLIES.
- E. REFERENCES TO THE WELLHEAD PROTECTION PLAN THAT DETAIL PROTECTION PLANS FOR DESIGNATED FUTURE WATER SUPPLIES.
- F. A SCHEDULE FOR INCORPORATION OF DESIGNATED FUTURE WATER SUPPLIES INTO THE WATER SYSTEM;
- G. AN ESTIMATION OF THE RESOURCES (AUTHORITY,CONSULTING EXPENSE, CAPITAL EXPENSES) NECESSARY TO INCORPORATE DESIGNATED FUTURE WATER SUPPLIES INTO THE SYSTEM BY THE SCHEDULE DETAILED IN ITEM F;
- H. IDENTIFICATION OF THE FINANCIAL RESOURCES AVAILABLE TO INCORPORATE DESIGNATED FUTURE WATER SUPPLIES INTO THE WATER SYSTEM

REFERENCE WHICH HAS BEEN MADE TO THE DICKSON WATER DEPARTMENT'S APPROVED EMERGENCY PLAN WILL BE SUFFICIENT FOR THOSE ITEMS WHICH ARE ADDRESSED IN THE EMERGENCY PLAN.

PUBLIC NOTICE

THE CITY OF DICKSON WATER & WASTEWATER DEPARTMENT HAS DEVELOPED A WELLHEAD PROTECTION PLAN FOR THE PURPOSE OF PROTECTING THE AREA AROUND THE CITY'S PUBLIC WELLS. THIS PLAN INCLUDES PROVISIONS TO PROHIBIT OR RESTRICT THE USE OF HERBICIDES & PESTICIDES WITHIN 100 FEET OF THE WELLS WHICH INCLUDES THE POSTING OF SIGNS AT EACH LOCATION WHICH READ "WELLHEAD PROTECTION AREA - NO CHEMICALS TO BE APPLIED TO THE LAND WITHIN 50 FEET OF THIS WELL". A RECORD WILL BE KEPT OF ANY HERBICIDES OR PESTICIDES APPLIED WITHIN 100 FEET OF THE WELLS. THE PLAN ALSO INCLUDES A CONTINGENCY PLAN OF PROCEDURES TO BE IMPLEMENTED IN THE EVENT OF AN EMERGENCY SPILL WHICH COULD IMPACT THE WELLHEAD PROTECTION AREA. IN ADDITION, THE DEPARTMENT WILL ACTIVELY OBSERVE ACTIVITIES WITHIN THE WELLHEAD PROTECTION AREAS AND REPORT PERTINENT INFORMATION TO THE STATE OF TENNESSEE DIVISION OF WATER SUPPLY.

THE WELLS ARE LOCATED AS FOLLOWS:

DK-21 LOCATED OFF ROBINSON ROAD NEAR THE CITY'S ROBINSON TANK
DK-17 LOCATED ON GLENDALE DRIVE
DK-1 LOCATED AT THE DICKSON WATER FILTRATION PLANT.

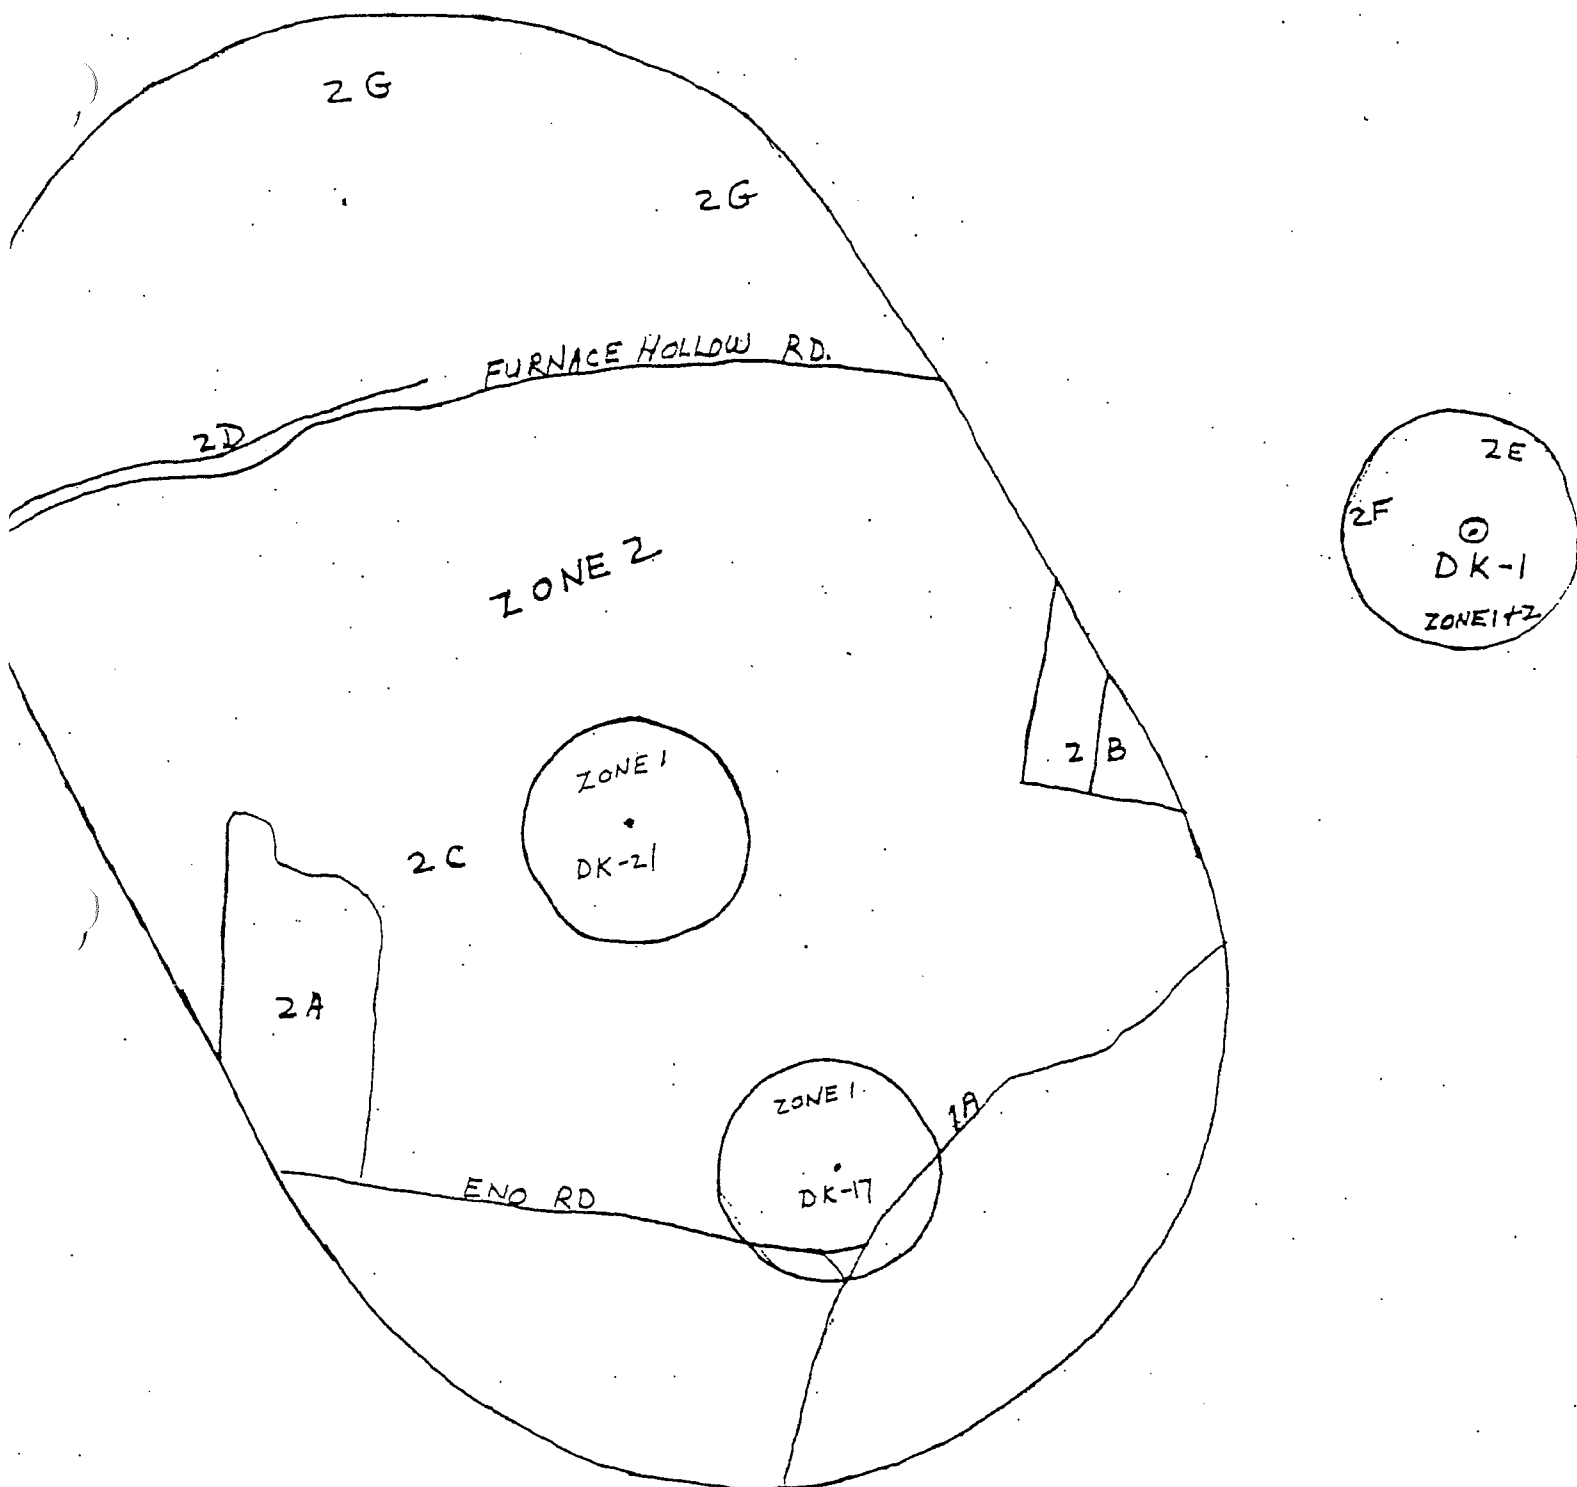

THE POTENTIAL SOURCES OF CONTAMINATION IN THESE AREAS ARE THE COUNTY LANDFILL, SEPTIC TANK DISCHARGES, AND AGRICULTURAL RUNOFF. SIGNS HAVE BEEN POSTED AT EACH WELL AS REFERENCED ABOVE. THE PUBLIC IS REQUESTED TO REPORT ANY ACTIVITIES THAT MIGHT RESULT IN GROUND WATER CONTAMINATION TO THE CITY OF DICKSON WATER DEPARTMENT.

IT IS CRITICAL TO ESTABLISH A WELLHEAD PROTECTION PROGRAM. THE SUCCESS WILL DEPEND TO A GREAT DEAL ON PUBLIC SUPPORT FOR THE PROGRAM. IT IS IMPORTANT TO MAINTAIN OUR PUBLIC DRINKING WATER SOURCE FOR FUTURE GENERATIONS.

THIS NOTICE WILL BE PUBLISHED AT SET INTERVALS OF 6 MONTHS IN THE DICKSON HERALD NEWSPAPER.

MR. JIM LUNN OF DICKSON COUNTY SOLID
WASTE THAT TRICHLOROETHYLENE HAD
BEEN DETECTED IN A SAMPLE FROM A SPRING
ON FURNACE HOLLOW ROAD. WE IMMEDIATELY
HAD WELL DK-21 TESTED FOR VOC'S.
THE RESULTS SHOWED ALL PARAMETERS < .0005 mg/L.

RE: Your letter of May 8, 1992 - Work Assignment #C04119
Document Control # C04119-SIP-LC-069

Dear Ms. Boulind:

As per your request, I am returning the two Quad sheets, marked with the pertinent water lines and City of Dickson sources. All water lines were not marked, due to the map scale. We are enclosing our "wall map" on a 1:600 ft. scale which does depict all City of Dickson treated water distribution lines.

In answering your questions, the following information is submitted:

1. The City of Dickson's average raw water pumpage is 1.1 MGD from all raw water sources. Peak pumpage is presently about 1.5 MGD on isolated days. We manage the raw water sources to retain the City Lake at a level not to exceed 2 ft below the spillway overflow. Capacities are as follows:
 - A. Piney River intake:
 - safe yield - 4.4 MGD
 - present pumpage capacity - 2.1 MGD
 - B. DK-17 Well
 - specific yield - 225 GPM
 - pump design - 160 GPM
 - total depth - 400 ft (below land surface)
 - pump setting - 173 ft (below land surface)
 - C. DK-21 Well
 - specific yield - 350 GPM
 - pump design - 350 GPM
 - total depth - 160 ft (below land surface)
 - pump setting - 131 ft (below land surface)
 - D. City Lake Intake
 - safe continuous yield - 0.7 MGD
 - present pumpage capacity - 2.1 MGD

2. The Piney River source is utilized as a sole source, primarily between June 1 to December 1 of each year. This may vary by 30 days each way, depending on rainfall. From December 1 to June 1, the City Lake is used as a primary source, and supplemented by DK-21 well from April 1 to June 1, (raw water to plant is mixed). When mixed, the Lake supply is approximately 0.90 MGD with DK-21 supplying 0.25 MGD. DK-17 well produces large quantities of sand, which has caused shaft bearing failures. We have not utilized DK-17 for some three (3) years
3. The City of Dickson, by contractual agreement purchase exactly 250,000 gallons per day of treated water from Turnbull Utility District. This contract was established in 1964 to allow a financial base for Turnbull Utility District to borrow funds from the Farmers Home Administration and to establish the utility district. Over the years, the Turnbull source has proven effective as an emergency supply. When needed, Turnbull Utility District can supply as much as 1.0 MGD to the City of Dickson of treated water, on a continuous basis.
4. The number of water connections is 3640, as of April 30, 1992. Primarily, each connection is a household or apartment. There are however, some housing units of varying sizes on a single connection. For approximation, of the above number, 30 connections could possibly serve 300 separate apartments.
5. The City of Dickson sells treated water to the West Piney Utility District to the south of the City (approximately 3.5 million gallons per month, and to the Sylvia-Tennessee City-Pond Utility District to the northwest of the City (approximately 5.0 million gallons per month).
6. Other utilities in Dickson County, other than those mentioned above are: Harpeth Utility District (serving Charlotte and northeast Dickson county area - spring as a source of supply, supplemented with purchased water from Turnbull Utility District); White Bluff Utility District (serving the town of White Bluff and areas north of the town - all water purchased from Turnbull Utility District); Town of Vanleer (serving the town of Vanleer and areas around the town - source is a spring - Distribution lines are linked to the Sylvia-Tennessee City-Pond Utility District for emergency supply.

7. To my knowledge since 1975, there have been no contamination problems in any of the Dickson sources.

If you require any explanation or further information, please contact me at the above address or at (615) 441-9502.

Sincerely,

T. Larry Gardner
